1 Expert reading contract

Public rationale boundary

Inspectable public rationale and evidence only. The inventory must not contain private chain-of-thought or derive scientific claims from layout, chronology, control authorization, or artifact integrity.

This document records inspectable premises, public warrants, evidence, conclusions, uncertainty, scope, authority, failures, and obligations. It does not expose private chain-of-thought. Execution authorization, artifact integrity, scientific epistemic status, and workflow disposition are independent. Chronological precedence does not mean logical or evidential support.

1.1 Status legend

Artifact integrity: whether referenced bytes and receipts validate **Scientific epistemic status:** the bounded support assigned to a claim **Workflow disposition:** what the workflow did with the item

Topology mode

dag

Required expert contrasts

["independent agreement versus minority dissent", "advisory finding versus repair authority", "diagnosis versus governed action"]

Declared profile topology

No specialized topology applies

Observed specialist roles

No specialist fan-out applies

A specialist fork or join is a workflow relation, not proof that specialist conclusions are mutually consistent. Finite, endpoint, asymptotic, and continuum boundaries remain separate unless an explicit validated inference connects them.

Complete public dossier

Step / skill

formalize_framework_state / kb-framework-state-formalizer

Question

At formalize_framework_state, how does RunEvidenceBundle bear on FrameworkState? Which repair direction is supported by independent reviews of the blocked run?

Typed premises

[{"statement": "RunEvidenceBundle: Five advisory reviews inspect the same frozen evidence bundle independently.", "type": "artifact"}]

Transformation / operator

derive_formal_obligations

Bounded public warrant

At formalize_framework_state, derive_formal_obligations checks RunEvidenceBundle before emitting FrameworkState. Authority boundary: May diagnose and route repairs; has no authority to prove claims, release artifacts, or perform epistemic upgrades.

Conclusion

formalize_framework_state produces FrameworkState: Prioritize the representation repair while preserving a minority scope objection.

Uncertainty

bounded by the declared artifact and open obligations

Typed edge summary

precedes: 23, contains: 17, supports: 7, refutes: 1, produces: 1

Edge meanings are explicit: precedes is chronology; supports/refutes/constrains are epistemic relations; contains/produces/branches/joins/refines/validates/blocks/hands-off are workflow relations.
