Manuscript Result Elaboration

Expert inference validation report

Focus question
Which additions are justified within theorem, prior-art, and manuscript scope?

Run Id
fixture.manuscript_result_elaboration.base

1 Expert reading contract

Public rationale boundary

Inspectable public rationale and evidence only. The inventory must not contain private chain-of-thought or derive scientific claims from layout, chronology, control authorization, or artifact integrity.

This document records inspectable premises, public warrants, evidence, conclusions, uncertainty, scope, authority, failures, and obligations. It does not expose private chain-of-thought. Execution authorization, artifact integrity, scientific epistemic status, and workflow disposition are independent. Chronological precedence does not mean logical or evidential support.

1.1 Status legend

Artifact integrity: whether referenced bytes and receipts validate **Scientific epistemic status:** the bounded support assigned to a claim **Workflow disposition:** what the workflow did with the item

4 Profile topology and workflow-specific contrasts

Projection lens

manuscript_result_elaboration

Topology mode

dag

Required expert contrasts

["finite versus asymptotic statement", "asymptotic versus continuum claim", "new result versus prior-art boundary"]

Declared profile topology

No specialized topology applies

Observed specialist roles

No specialist fan-out applies

A specialist fork or join is a workflow relation, not proof that specialist conclusions are mutually consistent. Finite, endpoint, asymptotic, and continuum boundaries remain separate unless an explicit validated inference connects them.

5 Expert inference dossiers

Each dossier is bound to its semantic event ID. Control-only events appear in the lifecycle appendix and are not scientific claims.

5.1 Inference 1: manuscript_result_elaboration.base.orchestrate_elaboration.inference

---

Trace disposition

Complete public dossier

Step / skill

orchestrate_elaboration / results-elaboration-workflow-orchestrator

Question

At orchestrate_elaboration, how does PaperDraft bear on ElaborationPlan? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "PaperDraft: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

artifact_grounded_transformation

Bounded public warrant

At orchestrate_elaboration, artifact_grounded_transformation checks PaperDraft before emitting ElaborationPlan. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

orchestrate_elaboration produces ElaborationPlan: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

Causal parents

["manuscript_result_elaboration.base.orchestrate_elaboration.control"]

5.2 Inference 2: manuscript_result_elaboration.base.interpret_context.inference

Trace disposition

Complete public dossier

Step / skill

interpret_context / results-context-interpreter

Question

At interpret_context, how does ElaborationPlan bear on ResultsContext? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "ElaborationPlan: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

artifact_grounded_transformation

Bounded public warrant

At interpret_context, artifact_grounded_transformation checks ElaborationPlan before emitting ResultsContext. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

interpret_context produces ResultsContext: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

5.3 Inference 3: manuscript_result_elaboration.base.extract_extensions.inference

---

Trace disposition

Complete public dossier

Step / skill

extract_extensions / results-extension-need-extractor

Question

At extract_extensions, how does ResultsContext bear on ExtensionNeeds? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "ResultsContext: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

artifact_grounded_transformation

Bounded public warrant

At extract_extensions, artifact_grounded_transformation checks ResultsContext before emitting ExtensionNeeds. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

extract_extensions produces ExtensionNeeds: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

5.4 Inference 4: manuscript_result_elaboration.base.decompose_modules.inference

---

Trace disposition

Complete public dossier

Step / skill

decompose_modules / results-open-module-decomposer

Question

At decompose_modules, how does ResultsContext bear on OpenModulePlan? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "ResultsContext: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

artifact_grounded_transformation

Bounded public warrant

At decompose_modules, artifact_grounded_transformation checks ResultsContext before emitting OpenModulePlan. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

decompose_modules produces OpenModulePlan: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

5.5 Inference 5: manuscript_result_elaboration.base.plan_strategy.inference

---

Trace disposition

Complete public dossier

Step / skill

plan_strategy / results-extension-strategy-planner

Question

At plan_strategy, how does ExtensionNeeds bear on ExtensionStrategy? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "ExtensionNeeds: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

artifact_grounded_transformation

Bounded public warrant

At plan_strategy, artifact_grounded_transformation checks ExtensionNeeds before emitting ExtensionStrategy. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

plan_strategy produces ExtensionStrategy: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscrip t result", "regime": "finite"}

5.6 Inference 6: manuscript_result_elaboration.base.self_refine.inference

---

Trace disposition

Complete public dossier

Step / skill

self_refine / results-critical-self-refiner

Question

At self_refine, how does ExtensionStrategy bear on RefinedResultCandidates? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "ExtensionStrategy: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

artifact_grounded_transformation

Bounded public warrant

At self_refine, artifact_grounded_transformation checks ExtensionStrategy before emitting RefinedResultCandidates. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

self_refine produces RefinedResultCandidates: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

5.7 Inference 7: manuscript_result_elaboration.base.formalize_finite_object.inference

---

Trace disposition

Complete public dossier

Step / skill

formalize_finite_object / results-finite-object-formalizer

Question

At formalize_finite_object, how does RefinedResultCandidates bear on FiniteObjectDefinition? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "RefinedResultCandidates: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

derive_formal_obligations

Bounded public warrant

At formalize_finite_object, derive_formal_obligations checks RefinedResultCandidates before emitting FiniteObjectDefinition. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

formalize_finite_object produces FiniteObjectDefinition: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

5.8 Inference 8: manuscript_result_elaboration.base.derive_proof_packet.inference

Trace disposition

Complete public dossier

Step / skill

derive_proof_packet / results-proof-packet-deriver

Question

At derive_proof_packet, how does RefinedResultCandidates bear on ResultsProofPacket? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "RefinedResultCandidates: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

validate_exact_claim_boundary

Bounded public warrant

At derive_proof_packet, validate_exact_claim_boundary checks RefinedResultCandidates before emitting ResultsProofPacket. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

derive_proof_packet produces ResultsProofPacket: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

5.9 Inference 9: manuscript_result_elaboration.base.audit_prior_art.inference

---

Trace disposition

Complete public dossier

Step / skill

audit_prior_art / results-prior-art-disqualifier-auditor

Question

At audit_prior_art, how does RefinedResultCandidates bear on PriorArtBoundaryAudit? Can the marked result be expanded without widening finite evidence into a continuum theorem?

Typed premises

[{"statement": "RefinedResultCandidates: The draft marks a finite result and an unresolved continuum paragraph.", "type": "artifact"}]

Transformation / operator

test_prior_art_disqualifiers

Bounded public warrant

At audit_prior_art, test_prior_art_disqualifiers checks RefinedResultCandidates before emitting PriorArtBoundaryAudit. Authority boundary: May elaborate and integrate supported manuscript claims; may not perform implicit discovery, erase disqualifiers, or promote finite evidence to continuum scope.

Conclusion

audit_prior_art produces PriorArtBoundaryAudit: Integrate the finite theorem and retain the continuum marker as an open obligation.

Uncertainty

bounded by the declared artifact and open obligations

Assumptions

None recorded

Scope before / after / model / regime

{"after": "finite theorem plus open continuum obligation", "before": "expansion marker", "model": "manuscript result", "regime": "finite"}

E Artifact and receipt ledger

Semantic ID	Complete recorded detail
No artifact and receipt ledger recorded.	

F Specialized projection ledger

Semantic ID	Complete recorded detail
No specialized projection ledger recorded.	

G Causal and workflow graph ledger

Typed edge summary

precedes: 38, contains: 27, supports: 12, refutes: 1, produces: 1

Edge meanings are explicit: precedes is chronology; supports/refutes/constrains are epistemic relations; contains/produces/branches/joins/refines/validates/blocks/hands-off are workflow relations.

G.1 Nodes

Node	Type	Label	Status
manuscript_result_elaboration.base.orchestrate_elaboration.control	event	authorization	Not recorded
manuscript_result_elaboration.base.orchestrate_elaboration.inference	event	orchestrate_elaboration produces ElaborationPlan: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded

Node	Type	Label	Status
evidence.12280bc737701a	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.interpret_context.control	event	authorization	Not recorded
manuscript_result_elaboration.base.interpret_context.inference	event	interpret_context produces ResultsContext: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded
evidence.cad43129a7d9de	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.extract_extensions.control	event	authorization	Not recorded
manuscript_result_elaboration.base.extract_extensions.inference	event	extract_extensions produces ExtensionNeeds: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded
evidence.7cdd1f5b4cc1f1	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.decompose_modules.control	event	authorization	Not recorded
manuscript_result_elaboration.base.decompose_modules.inference	event	decompose_modules produces OpenModulePlan: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded
evidence.d8d54fd6601227	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.plan_strategy.control	event	authorization	Not recorded
manuscript_result_elaboration.base.plan_strategy.inference	event	plan_strategy produces ExtensionStrategy: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded
evidence.cd1bb94148e272	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.self_refine.control	event	authorization	Not recorded
manuscript_result_elaboration.base.self_refine.inference	event	self_refine produces RefinedResultCandidates: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded
evidence.3fd6ff5576eeb6	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.certify_scope.control	event	authorization	Not recorded
manuscript_result_elaboration.base.certify_scope.inference	event	certify_scope rejects TheoremScopeDecision: The scope gate blocks continuum wording and the prior-art audit narrows the novelty statement.	Not recorded
evidence.e3ff7d17dcfaa1	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
obligation.d84df4b6249428	obligation	A cutoff-uniform proof packet would permit reconsidering the continuum paragraph.	Not recorded
manuscript_result_elaboration.base.formalize_finite_object.control	event	authorization	Not recorded
manuscript_result_elaboration.base.formalize_finite_object.inference	event	formalize_finite_object produces FiniteObjectDefinition: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded

Node	Type	Label	Status
evidence.3cc4d337d08230	evidence	tests/fixtures/reasoning_trace/evidence/workflow-evidence.json	Not recorded
manuscript_result_elaboration.base.derive_proof_packet.control	event	authorization	Not recorded
manuscript_result_elaboration.base.derive_proof_packet.inference	event	derive_proof_packet produces ResultsProofPacket: Integrate the finite theorem and retain the continuum marker as an open obligation.	Not recorded
